

## How to construct your "Grass Head"

An easy video to view before starting (optional)  
[https://www.youtube.com/watch?v=n5\\_k5EQ8BFI](https://www.youtube.com/watch?v=n5_k5EQ8BFI)

If using a length of stocking, tie a knot in one end.  
If using a knee high or very thin sock...you do not need to tie a knot.

Stuff stocking or sock with dirt (Approx 1 Cup)

Sprinkle the grass seed on top of the dirt and very pat gently.

Gather the top of the stocking and tie a knot as closely to the soil as possible  
without upsetting the seed.

If you choose, you can create a nose and ears by gently pulling out a small  
section of the nylon (filled with soil) on the front of the grass head and placing a  
band around it. Repeat for the ears.  
Glue wiggly eyes, buttons, etc on for the eyes.

## Taking care of your "Grass Head"

Once completed, place the grass head in a bowl of water and thoroughly soak it  
(Only once...to get it started).

Remove the grass head from the bowl and set it on top of a cup to catch runoff  
water and to hold your grass head upright.

Spritz the grass head each day.

Keeping the grass seed moist but not soaked.
